

WORK EXPERIENCE

Product Manager

July '25 – Current

Mounterra Innovations

- Drove the **0-to-1 MVP launch** of Trippechalo Experience OS, defining and prioritizing the core flows for QR-ticketing, live attendee tracking, and payment reconciliation - cutting event-ops turnaround time by **30%**.
- Led **GTM execution** for Trippechalo, onboarding the first 3 anchor vendors and processing **100+ tickets** across pilot events - validating product-market fit and converting early feedback into the next release cycle.
- Drove end-to-end development of a **B2B sports-facility platform** across iOS, Android & web, taking it from use-case definition to **multi-city deployment** and driving active adoption across 15+ facility owners managing bookings, ops, and workflows.
- Conceived and delivered a **hospitality management system** for a government client, owning the product cycle from requirements to delivery and using AI-assisted development to ship a working system on an accelerated timeline.
- Scoped multiple payment gateways such as Razorpay, Easebuzz and PhonePe - owning requirements through delivery to enable secure in-platform transactions.
- **Streamlined the engineering delivery pipeline** - introduced structured PRDs, sprint rituals, and a tracking flow that improved on-time release rate and cut dev rework in half.
- **Skills & Tools:** Product Roadmapping, PRD/BRD, GTM Strategy, Figma, Wireframing, Google Analytics, Flutter, NextJS, React, Firebase, Notion, N8N.

Business Analyst

April '24 – July '25

Shipsy

- Led end-to-end product implementations across multiple international markets, securing **\$250K+ in deal value** through delivery of complex logistics ecosystems under strict deadlines.
- Engineered a full implementation of Shipsy's **TMS platform** for Germany's key logistics and supply-chain company - Hellmann, scaling operations from **1 to 5 countries**, international integration workflows.
- Automated rate-card digitization to replace a manual process, **cutting go-live time by 20-30 days** per rollout and accelerating multiple client launches.
- Accelerated rollout of an on-demand delivery solution for a high-priority international client, completing it in **2 months against a 6-month timeline** while enabling **90-minute SLA** fulfillment.
- Owned end-to-end business communication and technical integration of **3PL carriers (FedEx, DHL Express, UPS, DX Delivery)** - from requirement gathering and scoping to delivery - expanding the platform's shipping coverage and giving clients multi-carrier flexibility.
- Designed and implemented primary replenishment solutions, translating product capabilities into business logic and leveraging route-optimization algorithms to drive a **30% reduction in client operational costs**.
- Conducted on-site **POC implementations for key clients such as Samsonite and Aramex** that led to major deal closures for the company.
- Conceived and **led a route-optimization initiative** built on Uber's H3 geospatial indexing - owning the problem framing, scope, and delivery, and aligning engineering with the client to ship it.
- Executed a portfolio of **7 implementation projects & 2 high-stakes POCs** over 12 months with a **80% delivery success rate** across varied geographies.
- Translated client logistics needs into structured **requirement docs (BRD/PRD)** and KPI dashboards (On-Time Delivery, Rider Efficiency), giving stakeholders the data visibility that drove post-implementation product adoption.
- **Skills & Tools:** BRD and PRD Development, Data Analysis, SQL, KPI Definition, Excel/Google Sheets, Lucid-chart, Jira, Confluence, Postman, Elastic Search, Automations.

EDUCATION

B.Tech in Computer Science

2020–2024

SRM University, Chennai, CGPA: 9.14
